

# BIKEINSIDE INTERIOR BIKE RACK

**„three bicycles on a roof rack mounted at the recommended speed of 130 km / h, increases fuel consumption and thus the cost to third“ (Der Spiegel)**

Get the benefits of bike transportation in vehicles secure and easy with the Bikeinside interior bicycle rack:

- Protection against theft and vandalism
- Dirt and moisture have no chance
- No change in aerodynamics of the car
- No additional fuel consumption
- No change in handling characteristics
- No worries when parking in underground garages
- Easy loading and unloading

**„trunk and hitch bike racks usually provide even greater air turbulence and thus driving resistance“ (Der Spiegel)**

## The advantages of the Bikeinside rack

- Suitable for any kind of vehicles if the bikes fit into the vehicle then it works
- Simple installation of the crossbar by telescope system with toggle bolt
- Secure state of the bicycles by fixing with quick release to the fork mounts - „Off Road Tested“
- For all types of bicycles such as MTB's, road bikes, trekking and city bikes
- For bikes with disc brakes
- With thru axle adapter also suitable for bikes with a through axle fork
- No changes to the vehicle needed
- Extendable depending on vehicle size
- 3 lengths, also for narrow scenarios
- The original since 1992
- recommend by BIKE, Mountainbike, aktiv radfahren, roadbike, Caravanning, surf, tour, BSN, MOT, Gute Fahrt, auto motor sport ...
